MEASURING STEPS & SIZE CHARTS

MALE MEASURING STEPS

Neck: Measure around the base of the neck where the collar will sit, keeping tape measure snug.

Chest: Measure the fullest part of the chest, keeping tape measure parallel to floor.

Waist: Measure around the narrowest point of the natural waistline (not over clothing), keeping tape measure snug, but not tight.

Hips: Stand straight with feet together and measure around the fullest part of the hips (about 9” below natural waistline), keeping tape measure parallel to floor.

Sleeve Length: Measure from the center back of neck to the outermost point of the shoulder, then continue measuring to the wrist, keeping tape measure centered at the elbow.

Inseam: Using similar pants that fit well, measure the length from the joint of pant legs to the bottom hem of the leg, rounding to the nearest half-inch. If pants are cotton or cotton blend, add half-inch to allow for shrinkage.

Skirts, Slacks: Order size according to larger of hip or waist measurement.

Shirts: Give actual neck size.

Waist: Measure around the narrowest point of the natural waistline (not over clothing), keeping tape measure snug, but not tight.

Hips: Stand straight with feet together and measure around the fullest part of the hips (about 8” below natural waistline), keeping tape measure parallel to floor.

Sleeve Length: Bend arm slightly and measure from the outermost point of the shoulder to the wrist, keeping tape measure centered at the elbow.

Inseam: Using similar slacks that fit well, measure the length from the joint of slack legs to the bottom hem of the leg, rounding to the nearest half-inch. If slacks are cotton or cotton blend, add half-inch to allow for shrinkage.

Maternity: Order your pre-pregnancy size when ordering Cintas maternity wear. If you expect to gain more than 25–30 pounds or are carrying multiple births, please order one size larger.

ADDITIONAL SIZING

Some garments are sized on a scale of P-A-F. Refer to chart below for your correct size in these styles.

HAT SIZING

Place tape measure at the middle of the forehead, slightly above the ears, and measure the circumference of the head, keeping tape measure parallel to floor around entire head. Tape measure should be kept snug, but not tight. Measuring 2 or 3 times for accuracy is recommended.

BELT SIZING

To ensure a proper fit, add two inches to your waist measurement when selecting a size. Your belt should fit comfortably when worn using the center hole. Or, using an existing belt that fits well, measure from the center hole to where the buckle connects to the strap. (Do not measure from end to end.)

Garments may vary in sizing. If you have questions, please contact our Customer Service Department at 1-800-423-1500.
